

CHAPTER 15 - ELEVATOR AND AMUSEMENT DEVICE DIVISION

SECTION .0100 - GENERAL PROVISIONS

13 NCAC 15 .0101 ELEVATOR AND AMUSEMENT DEVICE DIVISION

The main office of the Elevator and Amusement Device Division, which administers the provisions of Article 14, Article 14A, Article 14B and Article 15 of Chapter 95 of the North Carolina General Statutes, is located in the Raleigh office of the North Carolina Department of Labor. The mailing address and telephone number are:

Elevator and Amusement Device Division
North Carolina Department of Labor
1101 Mail Service Center
Raleigh, North Carolina 27699-1101
919-707-7927

History Note: Authority G.S. 95-110.4; 95-110.5; 95-111.4; 95-120;
Eff. August 1, 1987;
Amended Eff. December 1, 2004;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. March 1, 2025.

13 NCAC 15 .0102 APPLICABILITY

The requirements of this Chapter shall be applicable to the design, construction, installation, plans review, testing, inspection, certification, operation, use, maintenance, alteration, and relocation of, and investigation of accidents involving devices and equipment subject to Articles 14, 14A, 14B and 15 of Chapter 95 of the North Carolina General Statutes as hereinafter specified.

History Note: Authority G.S. 95-110.5; 95-111.4; 95-120;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0103 DEFINITIONS

(a) The definitions found in G.S. 95-110.3, 95-111.3 and 95-117 are applicable throughout this Chapter unless a different meaning is plainly required by the context.

(b) The following definitions also apply throughout this Chapter.

- (1) The term "alteration" means any change made to an existing device or piece of equipment other than the repair or replacement of damaged, worn or other parts necessary for operation.
- (2) The term "division" means the Elevator and Amusement Device Division of the North Carolina Department of Labor.
- (3) The term "existing installation" means any device or equipment, the application for the installation of which was filed with the department or the installation of which was completed before the effective date of the rules and regulations which are currently in effect.
- (4) The term "new installation" means any device or equipment, the application for the installation or relocation of which is filed with the department on or after the effective date of these rules and regulations.

History Note: Authority G.S. 95-110.3; 95-110.5; 95-111.3; 95-111.4; 95-117; 95-120;
Eff. August 1, 1987;
Amended Eff. December 1, 2004;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0104 NOTIFICATION OF DECISION BY OWNER OR OPERATOR

(a) Whenever the owner or operator of any device or equipment has received an order from the Commissioner that the use of the device or equipment should be stopped or limited pursuant to G.S. 95-110.6, 95-111.6, or 95-123, he shall notify the Director in writing within 15 days of receipt of such order:

- (1) certifying that the device or equipment has been repaired or altered in compliance with the Commissioner's specifications;
- (2) indicating his intention to comply with the standards of safety for such devices or equipment with the understanding that:
 - (A) the use of the device or equipment will be limited as specified by the Commissioner's order;
 - (B) the certificate of operation is suspended until the device or equipment has been repaired or altered in compliance with the Commissioner's specifications; or
 - (C) the certificate of operation has been permanently revoked; or
- (3) requesting a hearing pursuant to Chapter 150B of the General Statutes.

(b) Where the owner or operator fails to notify the Director within 15 days of receipt of the order or refuses to discontinue or limit operation of the device or equipment, the Director may obtain injunctive relief on behalf of the Commissioner.

History Note: Authority G.S. 95-110.5; 95-110.6; 95-111.4; 95-111.6; 95-120; 95-123;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0105 NOTATION OF SUSPENSION OR REVOCATION

History Note: Authority G.S. 95-110.5; 95-110.6; 95-111.4; 95-111.6; 95-120; 95-124;
Eff. August 1, 1987;
Repealed Eff. April 1, 2001.

13 NCAC 15 .0106 OCCURRENCE REPORTING FOR TRAMWAYS

(a) The owner of any aerial passenger tramway shall within 24 hours notify the Director of each and every occurrence involving such device or equipment when:

- (1) The occurrence results in death or injury requiring medical treatment, other than first aid, by a physician. First aid means the one-time treatment or observation of scratches, cuts not requiring stitches, burns, splinters and contusions or a diagnostic procedure, including examination and x-rays, which does not ordinarily require medical treatment even though provided by a physician or other licensed personnel; or
- (2) The occurrence results in a damage to the device indicating a substantial defect in design, mechanics, structure or equipment, affecting the future safe operation of the device. No reporting is required in the case of normal wear and tear.

(b) The Director, without delay, after notification and determination that an occurrence involving injury or damage as specified in Subsection (a) has occurred, shall make a complete and thorough investigation of the occurrence. The report of the investigation shall be placed on file in the office of the Division and shall give in detail all facts and information available. The owner may submit for inclusion in the file results of investigations independent of the department's investigation.

(c) No person, following an occurrence as specified in Subsection (a), shall operate, attempt to operate, use or move or attempt to move such device or equipment, or part thereof, without the approval of the Director, unless so as to prevent injury to any person or persons.

(d) No person, following an occurrence as specified in Subsection (a), shall remove or attempt to remove from the premises any damaged or undamaged part of such device or equipment or repair or attempt to repair any damaged part necessary to a complete and thorough investigation. The department must initiate its investigation within 24 hours of being notified.

History Note: Authority G.S. 95-120; 95-122;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0107 EXCEPTIONS AND SPECIAL DEVICES

The Director may at his discretion grant exceptions from the requirements of this Chapter or permit the use of other devices. Requests for exceptions or use of special devices shall contain specific information detailing how the exception or use of a special device will provide equivalent safety as the original design or device. Exceptions or the use of special devices shall be considered only when made by written request. All requests for exceptions or use of special devices shall be given due consideration by the Director and a decision rendered within ten days of receipt of such request whenever possible. Where the investigation of such requests makes it impossible to render a decision within the time specified, the person making the request shall be notified of the delay within ten days.

History Note: Authority G.S. 95-110.5; 95-111.4; 95-120; Eff. August 1, 1987; Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

SECTION .0200 – CODES AND STANDARDS

13 NCAC 15 .0201 NEW INSTALLATIONS OF ELEVATORS, ESCALATORS, DUMBWAITERS AND MOVING WALKS

(a) The design, construction, installation, inspection, and operation of all new installations of elevators, dumbwaiters, escalators, and moving walks, shall conform to the rules in this Section and the A17.1 - American National Standard Safety Code for Elevators and Escalators, which is incorporated by reference subject to the modifications provided in Paragraph (b) of this Rule. This incorporation includes subsequent amendments and editions of the Code.

(b) The provisions of the A17.1 - American National Standard Safety Code for Elevators and Escalators shall be subject to the following modifications:

- (1) Rule 2.1.2.1 – Observation Elevators Not Fully Enclosed. Change the rule to read as follows: For observation elevators which are not fully enclosed, protection at landings shall be provided as follows:
 - (A) An enclosure shall be provided which shall extend a minimum of ten (10) feet above the floor.
 - (B) The enclosure shall be constructed of unperforated material.
 - (C) Enclosures shall be located in the general line of the hoistway. Horizontal clearance shall be the same as stated in Section 2.5.
- (2) Rule 3.18.3.4 – Safety Bulkhead. Change the rule to read as follows:
 - (A) For new installations only, cylinders buried in the ground shall be provided with a safety bulkhead having an orifice of a size that would permit the car to descend at a speed not greater than 0.075 m/s (14 ft/min), nor less than 0.025 m/s (5 ft/min). A space of not less than 25 mm (1 in.) shall be left between the welds of the safety bulkhead and the other cylinder head. Safety bulkheads shall conform to 3.18.3.6.
 - (B) For existing installations only, cylinders buried in the ground do not have to be provided with a safety bulkhead of the type referred to in Part (A) of this Paragraph, provided that the following conditions are met:
 - (i) The relief valve setting and system pressure test prescribed by 8.11.3.2.1, and the cylinder test prescribed by 8.11.3.2.2, are each performed two times per year; and
 - (ii) After each of the tests referred to Subpart (i) of this Part, have been performed successfully, the test tag prescribed by 8.11.1.6 shall be installed in the machine room.
 - (C) A safety bulkhead shall not be required where a double cylinder is used and where both inner and outer cylinders conform to 3.18.3.

(c) The rules of this Chapter shall control when any conflict between these Rules and the A17.1 - American National Standard Safety Code for Elevators and Escalators exists.

(d) Copies of the A17.1 - American National Standard Safety Code for Elevators and Escalators are available for public inspection in the office of the Division, and may be obtained from the American Society of Mechanical

Engineers (ASME), via U.S. Mail at Two Park Avenue, New York, New York 10016-5990, via telephone at (800) 843-2763, or via the internet at www.asme.org. The cost is one-hundred ninety-five dollars (\$195.00) per copy.

History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Temporary Amendment Eff. January 1, 2000;
Amended Eff. December 1, 2004; July 1, 2003; April 1, 2001;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.

**13 NCAC 15 .0202 EXISTING INSTALLATIONS OF ELEVATORS, ESCALATORS,
DUMBWAITERS AND MOVING WALKS, ALTERATIONS, REPAIRS AND
EXCEPTIONS**

(a) Existing Installations. Existing installations of elevators, escalators, dumbwaiters, and moving walks shall be maintained under the departmental standards (if any) in effect at the time of their installation. Existing installations shall also meet the following standards, whether or not there were departmental standards in effect at the time of their installation:

- (1) Electrically-powered elevator driving machines shall be equipped with a friction brake applied by a spring or springs or by gravity and released electrically.
- (2) The car of every elevator suspended by wire ropes shall be provided with one or more safety devices. The safeties shall be attached to the car frame and one safety shall be located within or below the lowest members of the car frame (safety plank). All safeties shall be designed and installed in accordance with Section 2.17 of the A17.1 - American National Standard Safety Code for Elevators and Escalators.
- (3) Operating devices for electrically-powered or electrically-controlled elevators shall be of the enclosed electric type. Rope or rod operating devices activated directly by hand, or rope operating devices activated by wheels, levers or cranks shall not be used.
- (4) Elevator hoistways shall be enclosed throughout their height and all hoistway landing openings shall be protected with doors or gates. Hoistway enclosures shall be constructed to have a fire resistive rating of not less than one hour.
- (5) Hoistway enclosure doors or gates shall be equipped with electric interlocks.
- (6) Each elevator car shall be permanently enclosed on all sides and the top, except the sides for entrance and exit. Car side enclosures shall be of such strength and so designed and installed that when subjected to a pressure of 75 pounds applied horizontally at any point on the walls of the enclosure, the deflection will not exceed one inch.
- (7) Car top enclosures shall be so designed and installed as to be capable of sustaining a load of not less than 100 pounds at any one point.
- (8) An emergency exit with a cover shall be provided in the top of all elevator cars. The exit opening shall have an area of not less than 400 square inches and shall not measure less than 16 inches on any side. The exit shall be so located as to provide a clear unobstructed passage through it. The exit cover shall open outward and be hinged or otherwise attached to the car top and arranged to be opened from the top of the car only.
- (9) A door or gate shall be provided at each entrance to the car.
- (10) Doors shall be of the horizontally or vertically sliding type. Gates shall be of the vertically sliding or horizontally sliding collapsible type located not more than 1-3/4 inches from the car sill. Gates shall extend from a point not less than one inch above the car floor to not less than six feet above the car floor.
- (11) Vertically sliding gates when in the fully opened position shall provide an entrance of not less than six feet in height. Such gates shall be provided with pull straps to facilitate closing of the gate.
- (12) Each car door shall be equipped with a car door or gate electric contact so located as to be inaccessible from inside the car door and shall stop the car when the gate is opened a maximum of two inches.

The completion of any of the items in Subparagraphs (a)(1) through (12) of this Rule that increases the gross load of the elevator shall not reduce the safety factor of the driving machine below that required by Rule 2.24.3 of the A17.1 - American National Standard Safety Code for Elevators and Escalators.

(b) Exceptions. Existing elevators in warehouses of not more than two floors that are not accessible to the general public are exempt from Subparagraphs (a)(4) through (12) of this Rule providing that all of the following conditions are met:

- (1) The warehouse shall be used solely for the purpose of storing materials and products.
- (2) Hoistways that are not fully enclosed shall be protected by guards to prevent access to the hoistways by other than elevator personnel.
- (3) All capabilities of operating the elevator from the car or platform shall be removed.
- (4) Riders shall not be permitted to ride the car or platform.
- (5) A sign stating "Absolutely No Riders Permitted" in letters no less than one inch high on a contrasting background shall be posted at each entrance to the elevator.

(c) If an existing installation meets the requirements of Paragraph (a) of this Rule, it shall be issued a regular certificate of operation pursuant to Rule .0306 of this Chapter. If an existing installation is maintained under the departmental standards (if any) in effect at the time of its installation and is not exposing the public to an unsafe condition likely to result in serious personal injury or property damage, but does not meet the twelve standards specifically set out in Paragraph (a) of this Rule, it shall be issued a certificate of operation containing the following statement:

"Warning: This elevator has been inspected and found to be in a reasonably safe condition; however, it is not equipped with some of the safety features now required by the Department of Labor."

If the existing installation is not in compliance with the requirements of Paragraph (a) of this Rule, the following sign in letters no less than one inch high on a contrasting background shall be posted within and at each entrance to the elevator:

"Riders prohibited -- only a trained operator may ride this elevator."

(d) Units of existing installations which are out-of-service and not continuously maintained for a period exceeding one year shall be properly landed by complying with the following:

- (1) Land both car and counterweight (if any) at the bottom of the hoistway. Elevators of the roped type shall have their hoist ropes disconnected at both ends.
- (2) All electric power shall be removed by disconnecting and removing the power feeders.
- (3) All hoistway entrances shall be permanently secured to prevent accidental or inadvertent entry into the hoistway.

Any elevator, dumbwaiter, escalator or moving walk that has been properly landed or otherwise removed from service for a period exceeding one year shall comply with the requirements of the A17.3 - American National Standard Safety Code for Existing Elevators and Escalators in effect at the time they are returned to service, which is hereby incorporated by reference. This incorporation includes subsequent amendments and editions of this Code.

Copies of the A17.3 - American National Standard Safety Code for Existing Elevators and Escalators are available for public inspection in the office of the Division, and may be obtained from the American Society of Mechanical Engineers (ASME), via U.S. Mail at Two Park Avenue, New York, New York 10016-5990, via telephone at (800) 843-2763, or via the internet at www.asme.org. The cost is seventy-five dollars (\$75.00) per copy.

(e) Alterations, repairs, replacement, maintenance, inspections and operation of existing installations of elevators, escalators, dumbwaiters or moving walks shall conform to the requirements of Sections 8.6 and 8.7 of the A17.1 - American National Standard Safety Code for Elevators and Escalators.

*History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. January 1, 2005; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.*

13 NCAC 15 .0203 SAFETY STANDARD FOR MANLIFTS

(a) The design, construction, installation, alteration, repair, replacement, inspection, maintenance and operation of all manlifts shall conform to the rules in this Section and the A90.1 - American National Standard Safety Standard for Manlifts, which is hereby incorporated by reference. This incorporation includes subsequent amendments and editions of this Code.

(b) The rules of this Chapter shall control when any conflict between these rules and the A90.1 - American National Standard Safety Standard for Manlifts exists.

(c) Copies of the A90.1 - American National Standard Safety Standard for Manlifts are available for inspection at the offices of the Division and may be obtained from the American Society of Mechanical Engineers (ASME), via U.S. Mail at Two Park Avenue, New York, New York 10016-5990, via telephone at (800) 843-2763, or via the internet at www.asme.org. The cost is fifty dollars (\$50.00) per copy.

History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. December 1, 2004; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.

13 NCAC 15 .0204 PERSONNEL HOISTS CODE

(a) The design, construction, installation, alteration, repair, replacement, inspection and operation of all personnel hoists shall conform to the rules in this Section and the A10.4 - American National Standard Safety Requirements for Personnel Hoists, which is hereby incorporated by reference. This incorporation includes subsequent amendments and editions of this Code.

(b) The rules of this Chapter shall control when any conflict between these rules and the A10.4 - American National Standard Safety Requirements for Personnel Hoists exists.

(c) Copies of the A10.4 - American National Standard Safety Requirements for Personnel Hoists are available for inspection at the offices of the Division and may be obtained from the American National Standards Institute (ANSI), via U.S. Mail at 1899 L Street, NW, 11th Floor, Washington, DC 20036, via telephone at (202) 293-8020, or via the internet at www.ansi.org. The cost is fifty-three dollars (\$53.00) per copy.

History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. December 1, 2004; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.

13 NCAC 15 .0205 TRAMWAY REQUIREMENTS

(a) The rules of this Chapter shall control when any conflict exists between these Rules and the American National Standards Institute (ANSI) standards that are incorporated by reference herein.

(b) The construction, operation, and maintenance of all passenger tramways shall conform to the ANSI B77.1, Passenger Ropeways-Aerial Tramways, Aerial Lifts, Surface Lifts, Tows and Conveyors, which is hereby incorporated by reference, including subsequent amendments and editions.

(c) The construction, operation, and maintenance of all funiculars shall conform to the rules in this Chapter and the ANSI B77.2 – Funiculars – Safety Requirements, which is hereby incorporated by reference, including subsequent amendments and editions.

(d) Copies of all ANSI standards incorporated by reference in this Rule may be obtained from the American National Standards Institute via U.S. Mail at 1899 L Street, NW, 11th Floor, Washington, DC 20036, via telephone at (202) 293-8020, or via the internet at www.ansi.org. The cost of each publication is as follows:

- (1) ANSI B77.1 is two hundred dollars (\$200.00):
- (2) ANSI B77.2 is seventy-five dollars (\$75.00).

History Note: Authority G.S. 95-120;
Eff. August 1, 1987;
Amended Eff. December 1, 2004; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025; December 1, 2020.

13 NCAC 15 .0206 NATIONAL ELECTRICAL CODE

(a) All devices and equipment subject to this Chapter shall be designed, constructed, installed, maintained and operated in accordance with the rules in this Section and the requirements of the NFPA 70 - National Electrical Code, which is hereby incorporated by reference. This incorporation includes subsequent amendments and editions of this Code.

(b) The rules of this Chapter shall control when any conflict between these rules and the NFPA 70 -National Electrical Code exists.

(c) Copies of the NFPA 70 - National Electrical Code are available for inspection in the offices of the Division and may be obtained from the North Carolina State Board of Examiners of Electrical Contractors, via U.S. Mail at 505 N. Greenfield Parkway, Suite 100, Garner, NC 27529, via telephone at (919) 733-9042, or via the internet at www.ncbeec.org. The cost is fifty-nine dollars (\$59.00) per copy.

History Note: Authority G.S. 95-110.5; 95-111.4; 95-120;
Eff. August 1, 1987;
Amended Eff. December 1, 2004; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.

13 NCAC 15 .0207 SAFETY STANDARDS FOR STAIRWAY CHAIRLIFTS, AND INCLINED AND VERTICAL WHEELCHAIR LIFTS

(a) The design, construction, installation, alteration, repair, replacement, inspection, maintenance and operation of all installations of inclined stairway chairlifts, and inclined and vertical wheelchair lifts shall conform to the rules in this Section and the A18.1 - American National Standard Safety Code for Platform Lifts and Stairway Chairlifts, which is hereby incorporated by reference. This incorporation includes subsequent amendments and editions of this Code.

(b) The rules of this Chapter shall control when any conflict between these rules and the A18.1 - American National Standard Safety Code for Platform Lifts and Stairway Chairlifts exists.

(c) Copies of the A18.1 - American National Standard Safety Code for Platform Lifts and Stairway Chairlifts are available for inspection at the offices of the Division, and may be obtained from the American Society of Mechanical Engineers (ASME), via U.S. Mail at Two Park Avenue, New York, New York 10016-5990, via telephone at (800) 843-2763, or via the internet at www.asme.org. The cost is seventy-five dollars (\$75.00) per copy.

History Note: Authority G.S. 95-110.5;
Eff. December 1, 2004;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016;
Amended Eff. April 1, 2025.

13 NCAC 15 .0208 SAFETY STANDARDS FOR WIND TURBINE TOWER ELEVATORS

(a) The design, construction, installation, alteration, repair, replacement, inspection, maintenance, and operation of all installations of wind turbine tower elevators shall conform to the rules in this Section and Standard A17.8-2016 of the American Society of Mechanical Engineers, incorporated by reference with subsequent amendments and editions.

(b) The rules of this Chapter shall control if any conflict exists between these Rules and Standard A17.8-2016 of the American Society of Mechanical Engineers.

(c) Copies of Standard A17.8-2016 of the American Society of Mechanical Engineers are available for inspection at the offices of the Division and may be obtained from the American Society of Mechanical Engineers (ASME) via U.S. Mail at ASME Headquarters, Two Park Avenue, New York, New York 10016-5990, via telephone at (800) 843-2763; or via the internet at www.asme.org. The publication is available in print or digitally at a cost of fifty-eight dollars (\$58.00) per copy.

History Note: Authority G.S. 95-110.5;
Eff. November 1, 2018;
Amended Eff. April 1, 2025.

SECTION .0300 - ELEVATORS AND RELATED EQUIPMENT

13 NCAC 15 .0301 SECTION APPLICABILITY

The requirements of this Section are applicable to all devices and equipment within the scope of Article 14A of Chapter 95 of the General Statutes.

History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0302 RESPONSIBILITY

Responsibility for the installation, alteration, operation, maintenance, and reporting of accidents for elevators, dumbwaiters, escalators, moving walks, personnel hoists, and special equipment shall be as follows:

- (1) The equipment manufacturer shall be responsible for designing and manufacturing equipment in compliance with the applicable code.
- (2) The person or firm installing or altering elevators, dumbwaiters, escalators, moving walks, personnel hoists, and special equipment shall be responsible for obtaining all permits and approvals. He shall be responsible for the safe operation of equipment during the installation until a certificate of operation has been issued and for conducting all tests required by these rules.
- (3) The owner, his duly appointed agent, or the lessee shall be responsible for the safe operation and proper maintenance of elevators, dumbwaiters, escalators, moving walks, personnel hoists, and special equipment after the installation has been approved and a certificate has been issued. He shall be responsible for conducting all periodic or maintenance tests required by these rules.
- (4) The owner shall also be responsible for having elevators in closed buildings inspected by North Carolina Department of Labor inspectors. The owner or agent shall contact the Elevator and Amusement Device Division to arrange a convenient time for inspection. Elevators not inspected shall be considered as being removed from service.

History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0303 CONSTRUCTION PERMITS

(a) Before erecting or constructing a new elevator, dumbwaiter, workman's hoist, escalator, moving walk, stairway inclined lift, or vertical wheelchair lift, or before moving such an apparatus from one location to another, or before making alterations to existing equipment, the owner or his authorized agent shall obtain a permit from the Director. The owner or his authorized agent shall submit an application for a permit accompanied by duplicate plans and drawings showing the proposed construction, type of equipment and mode of operation. The application to install which consists of the original and three copies shall include the following information:

- (1) name and address of architect, owner, and installer;
- (2) type and design of equipment;
- (3) pertinent information as to the location of the equipment and such specifications as required by the Elevator Safety Code.

(b) Upon finding that the application is in compliance with the regulations of this Chapter, the Director will issue a permit, subject to final field inspection.

(c) The permit shall be posted in a conspicuous place on the job site prior to the start of any work to be done.

(d) Upon receiving information indicating violation of this Rule, the Director may cause the stoppage of all work on that job until a hearing, pursuant to the provisions of the Administrative Procedure Act, N.C. General Statutes, Chapter 150B Article 3 can be held to determine the reason for the violation.

(e) The operation or use of any new, altered, or relocated equipment subject to the Elevator Safety Code other than by the installer acting under the authority of a construction permit is prohibited until such equipment has passed tests and inspections as required by Rule .0305 of this Section and a certificate to this effect has been issued in accordance with Rule .0306 of this Section.

*History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0304 NUMBERING

All new devices and equipment shall have a registration number assigned by the Division painted on or attached in plain view to the elevator car, to the escalator or moving walk balustrade, or to the driving mechanism of all other equipment. This registration number also shall be shown on the certificate of operation. The owner or operator is responsible for having the registration number painted on or attached to the device or equipment.

*History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0305 ACCEPTANCE INSPECTION

(a) Notification. The person or firm installing, moving or altering any device or equipment shall notify the Director at least five days before the inspection is desired. The notification shall be in writing and shall include the following:

- (1) name and address of the contractor,
- (2) name and address of the owner,
- (3) location of the device or equipment,
- (4) date of request for inspection.

If the person or firm installing, moving or altering the device or equipment will not be ready for inspection on the date requested, he shall immediately notify the Director so that an inspector will not be required to make an unnecessary trip.

(b) Inspections. The Director or an inspector of the Division shall inspect all new, altered or relocated devices or equipment subject to this Chapter for conformity with the requirements of these regulations. The inspection shall be made, when practicable, within two days of the date requested.

(c) Elevators, Dumbwaiters, Escalators and Moving Walks. The person or firm installing, moving or altering an elevator, dumbwaiter, escalator, moving walk, inclined stairway chairlift, or inclined or vertical wheelchair lift, shall, in the presence of the Director or an inspector, subject the new, moved or altered portions of the equipment to an acceptance test as required by the Elevator Safety Code.

(d) Special Equipment. The person or firm installing, moving or altering any special equipment shall, in the presence of the Director or an inspector, subject the new, moved or altered portion of the equipment to such tests as may be required by the Director to insure safe operation.

(e) Violations. If, after inspecting and performing tests on the equipment, the inspector determines that the condition of the equipment is not in full compliance with the rules of this Chapter, the inspector will inform the person or firm installing, moving or altering the device of any violations and will require compliance before a certificate for operation, as prescribed in Rule .0306 of this Section, will be issued.

*History Note: Authority G.S. 95-110.5;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0306 CERTIFICATES OF OPERATION

(a) Issuing of Final Certificates of Operation. A certificate of operation shall be issued by the Director where the inspections and tests, required by Rule .0305 of this Section, show beyond a reasonable doubt that the equipment has been designed and installed in accordance with the requirements of these Rules.

(b) Framing of Certificates. The certificate furnished by the Director shall be maintained in a suitable frame under transparent cover.

(c) Numbering of Certificates. The final certificate of operation shall show the registration number of the equipment for which it is issued, as required in Rule .0304 of this Section.

(d) Posting of Certificates of Operation. The required certificates shall be posted conspicuously as follows:

- (1) inside elevator cars, or
- (2) inside dumbwaiter cars, or
- (3) inside escalator and moving walk machine rooms, or
- (4) in locations designated by the Division.

(e) Limited Certificate of Operation.

- (1) Issuance for Elevator. The Director may allow the temporary use of any elevator for passenger or freight service during its installation or alteration under the authority of a limited certificate, issued for each class of service. Such limited certificate shall not be issued for elevators until the elevator has been tested with rated load, and the car safety, hoistway door interlocks, car door switch, and terminal stopping devices have been tested to determine the safety of the equipment for construction purposes.
- (2) Issuance for Personnel Hoist. The Director may allow the temporary use of any personnel hoist under the authority of a limited certificate. Such limited certificate shall not be issued until the personnel hoist has been tested with rated load, and the car safety, hoistway door interlocks, car door switch, and terminal stopping devices have been tested to determine the safety of the equipment.
- (3) Life of Limited Certificates of Operation. Limited certificates of operation may in the case of an elevator be issued for a period not to exceed 90 days. Limited certificates of operation for a personnel hoist may be used for a period not exceeding the length of the applicable construction project. Such certificates may be renewed upon receiving a written request showing cause for renewal. Such request must be received 15 days prior to the expiration of said limited certificate.
- (4) Posting of Limited Certificates of Operation. Limited certificates of operation shall be posted conspicuously on each elevator or personnel hoist. Such limited certificates for elevators shall bear a notice stating that the equipment has not been finally approved.

(f) Revocation of Certificate of Operation.

- (1) The Director may revoke a certificate of operation for any of the following reasons:
 - (A) Operation of an unsafe device or equipment which is likely to result in personal injury or property damage.
 - (B) Failure to comply with the provisions of Article 14A of Chapter 95 of the North Carolina General Statutes or the rules in this Chapter.
 - (C) Non-payment of the inspection fees established in 13 NCAC 15 .0702 if payment is not received within 30 days of the date of invoice.
- (2) If the Director revokes a certificate of operation pursuant to 13 NCAC 15 .0306(f)(1), the affected party shall be given notice of the availability of an administrative hearing and of judicial review in accordance with Article 3 of Chapter 150B of the N.C. General Statutes.

(g) Reissuance of Revoked Certificate of Operation.

- (1) If the Director revokes a certificate of operation pursuant to 13 NCAC 15 .0306(f)(1)(a), the owner or operator shall notify the Director in writing when the hazard has been abated and shall request a reinspection of the device or equipment. Once the Director or his assignee has conducted the requested reinspection and has determined that the hazard has been abated and the device may be operated safely, the certificate of operation shall be reissued upon payment of the inspection fee pursuant to 13 NCAC 15 .0702 and the reissuance fee pursuant to 13 NCAC 15 .0706. Payment of the applicable fees shall be made in accordance with 13 NCAC 15 .0306(g)(4).
- (2) If the Director revokes a certificate of operation pursuant to 13 NCAC 15 .0306(f)(1)(b), the owner or operator shall notify the Director in writing when the provisions of Article 14A of Chapter 95 of the North Carolina General Statutes and the rules in this Chapter have been satisfied. Once the Director or his assignee has conducted the requested reinspection and determined that the provisions of Article 14A of Chapter 95 of the North Carolina General Statutes and rules of this Chapter have been satisfied, the certificate of operation shall be reissued upon payment of the inspection fee pursuant to 13 NCAC 15 .0702 and the reissuance fee pursuant to 13 NCAC 15 .0706. Payment of the applicable fees shall be made in accordance with 13 NCAC 15 .0306(g)(4).

- (3) If the Director revokes a certificate of operation pursuant to 13 NCAC 15 .0306(f)(1)(c), upon payment of the original inspection fee pursuant to 13 NCAC 15 .0702 and the reissuance fee pursuant to 13 NCAC 15 .0706, the certificate of operation shall be reissued. Payment of the applicable fees shall be made in accordance with 13 NCAC 15 .0306(g)(4).
- (4) Payment of the fees referenced in this rule shall be made by credit card, certified check, bank check or money order payable to the North Carolina Department of Labor. The owner shall notify the Division in writing when payment has been made.

*History Note: Authority G.S. 95-110.5; 95-110.6;
Eff. August 1, 1987;
Amended Eff. July 1, 2007;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0307 MAINTENANCE AND PERIODIC INSPECTIONS AND TESTS

(a) Inspections and Tests. Devices and equipment shall be subject to maintenance and periodic inspections and tests in accordance with the requirements of the A17.1 - American National Standard, incorporated by reference under Rule .0201 of this Chapter; and in accordance with the National Electric Code, incorporated by reference under Rule .0206 of this Chapter. Special equipment as defined by G.S. 95-110.4(n) shall be subject to periodic and to maintenance inspections and tests in accordance with A17.1 of the ASME Safety Code for Elevators and Escalators, the National Electric Code, and manufacturers' specifications.

(b) Inspections.

- (1) Advance Notice. Inspections shall be accomplished without advance notice, except where the Director determines that advance notice of an inspection is necessary to complete the inspection.
- (2) Inspection Report Forms. The inspector shall note findings of his inspection and tests on the inspection report form.

(c) Certificate of Operation Issuance.

- (1) Closing Conference. After the inspections and tests of the equipment prescribed in this Rule, the inspector shall, when possible, hold a closing conference with the owner or his representative.
- (2) Approval. When the inspector has determined that the equipment is in compliance with the rules in this Chapter and G.S. 95 Article 14A, the inspector may reissue the certificate of operation.
- (3) Violations creating unsafe conditions. When the inspector has determined the equipment is not in compliance with the regulations of this Chapter and all applicable law, and that the non-compliance creates an unsafe condition that exposes the public to an unsafe condition likely to result in serious personal injury or property damage, the inspector shall immediately order, in writing, that the use of the equipment be stopped until such time as it is determined that the equipment has been made safe for use by the public. The inspector shall provide the owner or his representative with a description of all violations and necessary repairs.
 - (A) Notice. After an inspector has issued a written order which stops or limits the use of the equipment, the owner or his representative shall notify the Division, in writing, when the equipment is brought into compliance with the regulations of this Chapter and G.S. 95 Article 14A.
 - (B) Reinspection. After receipt of written notice from the owner or his representative that the equipment has been brought into compliance with the regulations of this Chapter and all applicable law, an inspector shall reinspect to determine if all violations have been corrected and necessary repairs have been made and the equipment is in compliance with the rules in this Chapter and G.S. 95 Article 14A.
- (4) Violations not creating unsafe conditions. When the inspector has determined the equipment is not in compliance with the regulations of this Chapter and G.S. 95 Article 14A, and that the non-compliance does not create an unsafe condition which is exposing the public to an unsafe condition likely to result in serious personal injury or property damage, the inspector shall provide the owner or his representative with a description of all violations and necessary repairs.
 - (A) Corrective action. The owner or his representative shall have 60 calendar days from receipt of written notice of all violations and necessary repairs to comply with the regulations of this Chapter and all applicable law, correct violations and complete necessary repairs.

- (B) Notice. The owner or his representative shall notify the Division in writing within 60 calendar days of receiving written notification of the violations and necessary repairs that the equipment has been brought into compliance with the regulations of this Chapter and G.S. 95 Article 14A.
- (C) Follow-up Inspection. If the owner or his representative fails to provide notice of abatement as required by Part (B) of this Subparagraph, and an inspection is required to determine status of abatement, then the owner or his representative shall pay a follow-up inspection fee of two hundred dollars (\$200.00).

(d) Tests. Periodic tests required by the A17.1 - American National Standard Safety Code for Elevators and Escalators shall be performed in the presence of an elevator inspector whenever possible. In the absence of an inspector, a signed copy of the test report shall be sent to the Director of the Division without delay. The report shall be signed by the person conducting such tests.

Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

SECTION .0400 - AMUSEMENT DEVICES

13 NCAC 15 .0401 APPLICABILITY

The Section is applicable to all amusement devices within the scope of Article 14B of Chapter 95 of the General Statutes.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0402 RESPONSIBILITY FOR COMPLIANCE

- (a) Every owner, operator, manufacturer, or designer of an amusement device shall comply with the rules of this Section.
- (b) Designers and manufacturers of amusement devices shall follow the procedures of the ASTM F1159 – Standard Practice for Design of Amusement Rides and Devices that are Outside the Purview of Other F24 Design Standards, which is hereby incorporated by reference, including all subsequent amendments and editions.
- (c) Designers and manufacturers of amusement devices shall follow the procedures of the ASTM F1193 – Standard Practice for Quality, Manufacture, and Construction of Amusement Rides and Devices, which is hereby incorporated by reference, including all subsequent amendments and editions.

(d) Owners of amusement devices shall follow the procedures of ASTM F770 – Standard Practice for Ownership, Operation, Maintenance, and Inspection of Amusement Rides and Devices, which is hereby incorporated by reference, including all subsequent amendments and additions.

(e) Copies of all ASTM International standards incorporated by reference in this Rule may be obtained from ASTM International via U.S. Mail at P.O. Box C700, West Conshohocken, Pennsylvania 19428-2959, via telephone at (610) 832-9500, or via the internet at www.astm.org. The cost of each publication is as follows:

- (1) ASTM F1159 is forty-four dollars (\$44.00) per copy;
- (2) ASTM F1193 is fifty-six dollars (\$56.00) per copy;
- (3) ASTM F770 is forty-four dollars (\$44.00) per copy.

(f) An engineering analysis prepared by the manufacturer of each ride or device shall be submitted to the North Carolina Department of Labor, Elevator and Amusement Device Bureau, prior to the time of inspection and before the ride or device is operated in North Carolina.

*History Note: Authority G.S. 95-111.4;

Amended Eff. December 1, 2020.*

13 NCAC 15 .0403 LOAD TESTS

(a) Test Required. Load tests will not be required on a regular basis. The Director may, however, at his discretion require a load test to be made on devices of the following types:

- (1) devices having suspended passenger seats or spaces,
- (2) devices normally operated at speeds or with movements creating severe centrifugal forces,
- (3) devices so elevated that structural failure is likely to cause passengers to be injured by falling, or
- (4) devices on which the Director has ordered such a test upon finding it necessary to assure safety.

(b) Evidence of Test. Unless a load test is made in the presence of a representative of the Director, the Director may accept a certified copy of such test made by a person qualified to perform such tests, showing whether the device withstood the test without failures in any material respect and setting forth such other relevant information as the Director may require. Until such a statement is so filed it shall be presumed that the device has not withstood the test as required.

(c) Nature of Test. Each passenger seat or space shall be weighted with at least 170 pounds dead weight, except that in a device intended only for small children each seat or space shall be weighted with at least 90 pounds as recommended by ASTM F 1159. While so loaded the device shall be so operated at maximum normal speed as to test the full operation or all control devices, speed limiting devices, brakes and other equipment provided for safety.

(d) Effect of Test. If the device fails to withstand a load test it shall be deemed unsafe and shall not be used until and unless it has withstood a subsequent load test without failure in any material respect. If the device has withstood a load test without failure in any material respect it shall be required to be so tested again only if rebuilt or modified or if there are reasonable grounds to believe that a further test is necessary to assure safety and the Director orders such test to be made.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0404 LOCATION NOTICES

No amusement device shall be used at any time or location unless prior notice has been given to the Director pursuant to G.S. 95-111.8. Notice shall include:

- (1) the name and permanent address of the operator,
- (2) the name and identification number of every amusement device,
- (3) the intended date(s) and location(s) of use, and
- (4) the date the inspection is requested.

History Note: Authority G.S. 95-111.4; 95-111.8;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0405 INSPECTIONS

An inspector shall inspect each amusement device at each location to determine if the device:

- (1) has been soundly constructed and properly erected,
- (2) has been modified to comply with any changes in safety requirements prescribed by the manufacturer,
- (3) has complied with the rules and regulations of this Section, and
- (4) has in existence a policy of insurance as required by G.S. 95-111.12.

History Note: Authority G.S. 95-111.4; 95-111.12;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0406 UNSAFE DEVICES

If the inspector finds that the amusement device presents an imminent danger, he may attach to such device a notice warning all persons against the use thereof. Such notice shall not be removed until the device is made safe, and then only by a representative of the Director. In the meantime, the device shall not be used.

History Note: Authority G.S. 95-111.4; 95-111.6; 95-111.9;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0407 IDENTIFICATION AND RATING PLATES

Every amusement device shall be identified by a trade or descriptive name and an identification number, and there shall be firmly attached to the device in a readily visible location a metal plate upon which there is legibly impressed the name and number of the device, its model number if any, and the name and address of its manufacturer. Upon the same or another metal plate so attached there shall be legibly impressed the maximum safe number of passengers, and the maximum safe speed.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0408 REBUILT AND MODIFIED DEVICES

If an amusement device which has withstood a performance test as required in Rule .0403 of this Section is thereafter materially rebuilt or so modified to change its original action:

- (1) The device shall be re-identified by a different name or identification number or both.
- (2) The device shall be subject to all other rules of this Section as if it were a new device not previously used.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0409 ASSEMBLY AND DISASSEMBLY

- (a) **Competent Supervision.** The assembly and disassembly of an amusement device shall be done by or under the immediate supervision of a person experienced and instructed in the proper performance of such work in respect to the device.
- (b) **Quality of Assembly.** Assembly work shall be performed in a proper and workmanlike manner. Parts shall be properly aligned, and shall not be bent, distorted, cut or otherwise injured to force a fit. Parts requiring lubrication shall be lubricated in course of assembly. Fastening and locking devices, such as bolts, cap screws, cotter pins, and lock washers, shall be installed where required for dependable operation. Nuts shall be drawn tight, cotter pins shall be spread and lock nuts firmly set. All brakes shall be adjusted for proper operation.
- (c) **Welding.** Welding of parts upon which safe operation depends shall be done by welders qualified in accordance with the requirements of the American Welding Society.
- (d) **Quality and Inspection of Parts.** Parts which are excessively worn or which have been materially damaged shall not be used. Close visual inspection of parts shall be made during assembly to discover such wear or damage and immediate inspection of fastening devices shall be made after assembly to assure that they have been properly installed.
- (e) **Tools and Equipment.** Persons engaged in the assembly or disassembly of amusement devices shall be provided with and shall use tools of proper size and design to enable the work to be done safely. Broken, damaged and unsuitable tools shall not be used. Electrically operated tools shall be grounded during use. Ladders, scaffolds, and safety belts used in assembly or disassembly work shall be of such design, material and construction as to provide reasonable and adequate protection to the persons using them. Fiber rope used in assembly or disassembly work shall be standard quality manila or equivalent in strength. Tackle blocks shall be of a size to fit the rope. All load-carrying equipment shall be designed and constructed throughout to support the intended load.
- (f) **Lighting.** Assembly and disassembly of amusement devices shall be done under light conditions sufficient to permit the work to be properly performed and inspected.
- (g) **Persons in Work Area.** A sufficient number of persons to do the work properly shall be engaged for the assembly or disassembly of amusement devices. Persons not so engaged in this work and who may create a hazard shall be prevented from entering the work area.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0410 DAILY INSPECTION AND TEST

An amusement device shall be inspected and tested each day when it is intended to be used. The inspection and test shall be made by a person experienced and instructed in the proper assembly and operation of the device and shall be performed before the device is put into normal operation. The inspection and test shall include the operation of control devices, speed-limiting devices, brakes and other equipment provided for safety. A record of each inspection and test shall be made at once upon completion of the test on a form provided by the Director and shall be kept with the device and available to the Director for at least the previous 12 months.

*History Note: Authority G.S. 95-111.4; 95-111.5;
Eff. August 1, 1987;
Amended Eff December 1, 2004;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0411 CONTROL OF OPERATION

Every operator shall have knowledge of the use and function of all normal emergency operation controls and of the proper use of the device. An operator shall be in the immediate vicinity of the operating controls during operation and no other person shall be permitted to handle such controls during normal operation. This provision does not apply to amusement devices designed to be operated or controlled by a passenger.

*History Note: Authority G.S. 95-111.4; 95-111.11;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0412 OVERLOADING AND OVERSPEEDING

An amusement device shall not be overcrowded, or loaded in excess of its carrying capacity; nor shall it be operated at an unsafe speed or at any speed beyond that recommended by the manufacturer.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0413 WIND AND STORM HAZARDS

The manufacturer or designer of amusement rides or devices shall post on the ride, in a prominent place, the maximum design wind speed for safe operation of the ride. An amusement device which is exposed to wind or storms shall not be operated under dangerous weather conditions except to release or discharge occupants.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0414 LIGHTING

(a) Amusement devices, access thereto and exits therefrom, shall, while in operation or occupied, be provided with illumination by natural or artificial means sufficient to guard against personal injuries under these circumstances.
(b) Lighting fixtures shall have their lamps guarded to protect against accidental contact and to reduce possible injury from glass if the lamps break. Fluorescent lamps installed on or over moving parts of a ride shall be covered with plastic sleeves.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0415 DESIGN AND CONSTRUCTION REQUIREMENTS

(a) All structures used in connection with amusement devices shall be so designed and constructed as to carry safely all loads to which such structures may normally be subjected.
(b) All amusement devices shall be designed, constructed and installed so as to withstand any normal stresses to which they may be subjected.
(c) Before being used by the public, amusement devices shall be so placed or secured with blocking, cribbing, outriggers, guides or other means as to be stable under all operating conditions.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0416 NUMBER OF EXITS

At least two exits remote from each other shall be provided from each floor, tier, room or balcony in structures which house amusement devices and which are not places of public assembly. No exit shall be less than 20 inches wide.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0417 ACCESS AND EGRESS

(a) General Requirements. Safe and adequate means of access to and egress from amusement devices shall be provided. Such means of access and egress shall have:

- (1) protection from adjacent hazards or from falling by the use of rails, enclosures, barriers or similar means;
- (2) secure treading and supporting surface free from debris, obstruction, projections and slipping, tripping, and other hazards;
- (3) adequate clearance.

(b) Design of Stairways, Landings and Ramps. Stairways, landings and ramps shall be designed, constructed and maintained so as to sustain safely a live load of at least 90 pounds per square foot.

(c) Stairways, Ramps and Platforms. Stairways and ramps shall be at least 20 inches wide. Stair treads shall be at least nine inches deep exclusive of nosing and the height of rise shall not exceed eight inches. Between any two levels the treads shall be of uniform depth and the risers of uniform height. The slope of ramps shall not exceed one in four. The open sides of stairways, ramps and platforms shall be provided with adequate protection against falling except as the safe and normal access to the device may otherwise require.

(d) Measurement of Widths. The width of a stairway shall be taken as the length of the treads between stringers. The width of a doorway shall be taken as the width of the door.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0418 EMERGENCY BRAKES AND ANTI-ROLLBACK DEVICES

If cars or other components of an amusement device may collide in such a way as to cause personal injuries upon failure of normal controls, emergency brakes sufficient to prevent such collisions shall be provided. On rides which make use of inclined tracks, automatic anti-rollback devices shall be installed to prevent backward movement of the passenger carrying units in case of failure of the propelling mechanism.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0419 SIGNAL SYSTEMS

Signal systems for the starting and stopping of amusement devices shall be provided where the operator of the device does not have a clear view of the point at which passengers are loaded or unloaded. Any code of signals adopted shall be printed and kept posted at both operator's and signalman's stations. All persons who may use these signals shall be carefully instructed in their use. Signals for the movement or operation of an amusement device shall not be given until all passengers and other persons who may be endangered are in a position of safety.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0420 PUBLIC PROTECTION

An amusement device shall not be used or operated while any person is so located as to be endangered by it. Areas in which persons may be so endangered shall be fenced, barricaded, or otherwise guarded against public intrusion.

When fences are used to comply with this Rule, the fences:

- (1) shall be at least 42 inches high; and
- (2) shall not have horizontal mullions; and
- (3) shall have mullions located to reject a ball:
 - (a) six inches in diameter if the fences are used for amusement devices manufactured before January 1, 1993; and

- (b) four inches in diameter if the fences are used for amusement devices manufactured after January 1, 1993.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Amended Eff. April 1, 2001; May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0421 GUARDING OF MACHINERY

Machinery used in or with an amusement device shall be enclosed, barricaded or otherwise effectively guarded against contact. Guards removed for maintenance purposes shall be replaced before normal operation is resumed.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0422 SPEED-LIMITING DEVICES REQUIRED

An amusement device powered so as to be capable of exceeding its maximum safe operating speed shall be provided with a maximum speed-limiting device.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0423 PASSENGER-CARRYING DEVICES

The interior and exterior parts of all passenger-carrying amusement devices with which a passenger may come in contact shall be smooth and rounded, free from sharp, rough or splintered edges and corners, with no protruding studs, bolts, screws or other projections which might cause injury. Interior parts upon or against which a passenger may be forcibly thrown by the action of the ride shall be adequately padded. Devices which are self-powered and which are operated by a passenger shall have the driving mechanism so guarded and the guards so locked in place as to prevent passengers from gaining access to the mechanism. Such belts, bars, foot rests and other equipment as may be necessary for safe entrance and exit and for support while the device is in operation shall be provided. Such equipment and the fastenings thereof shall be of sufficient strength to retain the passengers. The fastenings shall be of a type which cannot be inadvertently released.

History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.

13 NCAC 15 .0424 ELECTRICAL SAFETY REQUIREMENTS

(a) General Requirements. All electrical wiring, equipment and apparatus used for amusement devices or for lighting shall comply with the National Electrical Code, NFPA 70 and shall be properly and legally installed, operated and maintained.

- (1) Branch Circuits. The circuit for each ride shall be protected by fuses or a circuit breaker at the junction box or at the generator.
- (2) Disconnecting Means. Each ride shall be provided with a main line disconnect switch or breaker. The disconnect switch or breaker shall be located at the ride. Each branch circuit on a ride shall be further provided with a disconnecting means.
- (3) Conductors. Conductors supplying current to rides shall be of moisture resistant construction and insulated for the maximum voltage supplied to the ride.
- (4) Grounding. Grounding of rides shall be by means of one or more grounding electrodes driven at the generator or other service. The grounding conductor to each junction box shall be of sufficient

size to carry the maximum voltage generated by the system. Grounding conductors to each ride shall not be less than No. 8 awg. wire size.

- (b) Protection of Employees. No employee shall be suffered or permitted to work in such proximity to any part of an electric power circuit that he may contact the same in the course of his work unless he is protected against shock by de-energizing the circuit, grounding it or guarding it, by effective insulation. If protection is supplied by de-energizing the circuit, the switch controlling the circuit shall be locked out to prevent inadvertent closing.
- (c) High Voltage Lines. The outlets of electric power lines carrying more than 120 volts shall be clearly marked to show their voltage.
- (d) Transformers. All electrical transformer sub-stations shall be properly enclosed and proper warning signs posted.
- (e) Outdoor Apparatus and Wiring. Electrical apparatus and wiring located outdoors shall be of such quality and so constructed or protected that exposure to weather will not interfere with its normal operation.
- (f) Elevated Lines. Elevated power lines crossing access or other roads within the grounds of a carnival, fair or amusement park shall be so suspended as to provide minimum vertical clearance of 12 feet from the road surface and minimum horizontal clearance of three feet on each side of the normal passage space of vehicles.
- (g) Grounding. Temporary electric installations shall be properly grounded.
- (h) Exposed Conductors. Bare wires and other uninsulated current-carrying parts shall be guarded against inadvertent contact by means of proper location or by fence or other barrier.
- (i) Overcurrent Protection. Conductors shall be provided with overcurrent protective devices according to load. No such device shall be installed in neutral or grounding conductors.
- (j) Generator Grounding. Where electrical power is supplied for an amusement device or a temporary structure by a privately operated generating system, the generator and all equipment shall be properly grounded if the system incorporates a ground.
- (k) Receptacles and Caps. All receptacles and attachment caps shall be of the ground type.
- (l) Abrasion Protection. Wiring laid on surfaces traversed by vehicular or pedestrian traffic shall be adequately protected against wear and abrasion.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Amended Eff. May 1, 1992;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0425 AIR COMPRESSORS AND EQUIPMENT

Air compressors, air compressor tanks and equipment used in connection therewith shall be constructed, equipped and maintained to insure safe operation at all times. They shall be inspected and tested at least once a year by a qualified person and a record of each inspection shall be kept and made available to the inspector. Air compressor tanks and other air receivers used in connection with air compressors shall have the maximum allowable working pressure conspicuously marked thereon.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0426 FIRE PREVENTION AND PROTECTION

- (a) Fire Resistance of Fabrics. Fabrics constituting part of an amusement device shall be fire-resistant to meet the following standard: Two strips or test sections either of the fabric used or of other fabric identical therewith shall be tested. Each strip shall be not less than six inches wide and 12 inches long. Each strip shall be thoroughly dry and shall then be subjected to an open flame applied to the lower edge while the strip is held vertically for 12 seconds. Neither strip shall flame for more than two seconds after the test flame is removed from contact nor shall the average length of char exceed 2-1/2 inches. Such a test is not required by this Section if other evidence of the required degree of fire resistance is accepted by the Commissioner as sufficient.
- (b) Fire Extinguishers. Approved fire extinguishers shall be provided where necessary to secure reasonable and adequate protection from fire hazards.

(c) Flammable Waste. Flammable waste such as oily rags and other flammable materials shall be placed in a covered metal container which shall be kept in easily accessible locations. Such containers shall not be kept at or near exits.

(d) Flammable Liquids and Gases. Gasoline and other volatile liquids and flammable gases when stored shall be kept in reasonably cool and ventilated places. Such liquids shall be in approved safety cans. They shall not be stored on or near a device while it is in operation. Smoking and the carrying of lighted cigar, cigarettes or pipes is prohibited in any area where such liquids or gases are stored or are transferred from one container to another.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0427 CLEANLINESS

A suitable number of metal containers for refuse shall be provided in and around all amusement devices. Excessive accumulations of trash or rubbish shall be promptly removed. All parts of amusement devices used by passengers or customers shall be maintained in a clean condition.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0428 SUBSTITUTE DEVICES AND PARTS

Whenever the owner or operator of an amusement device desires to install or use a substitute part or device which is not consistent with the manufacturer's specifications, the owner or operator shall be responsible for proving, to the satisfaction of the Director, that the use of the substitute part or device is as safe as the use of the manufacturer's specified part or device. The cost of all testing shall be borne by the owner or operator.

*History Note: Authority G.S. 95-111.4;
Eff. August 1, 1987;
Pursuant to G.S. 150B-21.3A, rule is necessary without substantive public interest Eff. January 5, 2016.*

13 NCAC 15 .0429 GO KARTS

(a) Go Kart Design. All go karts shall comply with the following standards.

- (1) Numbering of Go Karts. Each shall be provided an identifying number that can be easily seen by the operator. A corresponding number shall be stamped or attached to the frame of the go kart.
- (2) Speed. Go kart speed shall not exceed the maximum speed for which the track is designed. The speed of adult go karts shall be set not to exceed 28 miles per hour unless approved by the Department. Kiddie go karts shall not exceed 10 miles per hour. When a go kart is designed to permit the readjustment of its maximum speed, the means of adjustment shall not be accessible to the driver of the go kart.
- (3) Seats, Seat Belts and Shoulder Straps. All go karts shall meet one of the following requirements:
 - (A) The seat, back rest, and leg area shall be designed to retain the driver/occupants inside the go kart in the event of a rollover or a collision at the front, rear, or side of the go kart; or
 - (B) The go kart shall be equipped with seat belts and shoulder straps mounted in a manner that will restrain the occupant(s) in the vehicle in case of a collision or rollover. Properly mounted safety harnesses as effective as seat belts and shoulder straps may be substituted for seat belts and shoulder straps.
- (4) Occupancy. Go karts shall be occupied by only one person at a time unless the go kart is designed and equipped with a seat and safety belt system that is intended for and is suitable for two persons.
- (5) Guarding of Parts. Rotating, moving, hot engine or muffler parts shall be guarded to prevent contact or entanglement of the occupant's hair, clothing, or other body parts.
- (6) Brakes. Go karts shall have a braking system designed and adjusted to permit them to be brought to a complete stop within 40 feet from maximum speed with their maximum weight on board.

- (7) Brake and Throttle Controls. Go karts shall have brake and throttle controls that are readily recognizable as to their function. The operator shall also instruct each driver on the operation of the brake and throttle controls before each operation. The controls shall return automatically to their non-operational position when released.
 - (8) Padding of Exposed Protruding Components. Go karts shall have their steering wheel hub and all other protruding exposed parts within the driving compartment padded to minimize the risk of injury to an occupant in the event of a collision or overturn.
 - (9) Roll Bars and Head Rests. All adult go karts must be provided with a roll bar of sufficient height and strength to provide the occupant with protection in the event of a roll over. Seats of all go karts must be provided with a padded head rest. The head rest may substitute as a roll bar if it is of sufficient height and strength.
 - (10) Bumpers. Go karts shall be provided with bumpers or energy absorption body parts.
 - (11) Wheel Guards. The wheels of every go kart shall be enclosed or guarded in such a manner that the wheels of another go kart cannot interlock with or ride over them.
 - (12) Fuel Tanks. Go kart fuel tanks shall be designed and mounted so that the tank cannot be ruptured in the event of a collision or a roll over.
 - (13) Noise Level. Go karts shall be provided with muffler systems capable of limiting sound from the engine to 75 dBA when measured at a distance of 50 feet from the outer edge of the go kart track.
- (b) Track Design. Plans for proposed construction of go kart tracks in the State of North Carolina shall be submitted to the North Carolina Department of Labor, Elevator and Amusement Device Division, 1101 Mail Service Center, Raleigh, North Carolina 27699, before construction begins. Buildings on the track site must be submitted to the local building inspection agency for approval. The design of the track shall be consistent with go kart manufacturer's recommendations for the speed of the go kart and be approved by the department. The following requirements for track layout, track surface and track materials contained in Paragraphs (c), (d) and (e), of this Rule, shall be complied with before certificates of operation will be issued.
- (c) Track Layout. Go kart tracks may be oval shaped or of road course configurations. They may not be constructed in the shape of a figure eight or have any cross connected points. Straight portions of the track shall be flat except that 2 degrees of banking may be provided for drainage. The width of all tracks shall be a minimum of 16 feet wide. Road courses may continue the same width for their entire length. Oval tracks shall have turns at least five feet wider than the straight portions and the minimum radius of the turns shall be 15 feet. Turns of oval tracks may be banked to a maximum of one inch for each one foot of track width. Any variation from the minimum track width shall be approved in advance, in accordance with 13 NCAC 15 .0107.
- (d) Track Surface. A go kart track shall have a hard smooth surface. It shall provide sufficient road grip to be driven throughout the course at maximum speed. It shall be free of obstacles such as holes or bumps, or water or oil.
- (e) Track Materials. Materials used in the surfacing of go kart tracks shall be asphalt, concrete, or other solid and binding materials. Proposals to use dirt track surfaces shall be submitted for special consideration and evaluation, in accordance with 13 NCAC 15 .0107.
- (f) Track Safety and Guarding.
- (1) Barriers. Every go kart track shall provide properly constructed barriers along the entire course on both inside and outside of the track. Barriers shall be so constructed that a go kart colliding with a barrier at maximum speed will come to a safe stop or be guided back to the track. Earthen berms may be used as a barrier provided they will stop a go kart safely. Bales of hay, straw, or other materials capable of being ignited may not be used as a barrier.
 - (2) Track Lanes. White or yellow lines, at least four inches wide, shall mark all inside and outside edges of the track.
 - (3) Fencing. The outside perimeter of a go kart track shall be protected by a fence at least 48 inches in height. The fence shall be set back at least 36 inches from the inside face of the track barrier. Gates shall be located for easy supervision by track attendants when the facility is open and they shall be kept locked when it is closed. The fence may be omitted where natural barriers provide the same degree of protection as the fence. Where two separate tracks are operated inside a single perimeter fence all go karts on both tracks shall start and stop at the same time.
 - (4) Fire Extinguishers. Every go kart track shall be equipped with ABC Dry Chemical Fire Extinguishers. The extinguishers shall have a minimum capacity of five pounds, in accordance with NFPA 10 – Standard for Portable Fire Extinguishers. At least one extinguisher shall be located in the following locations:
 - (A) Within seventy feet of every track section;

- (B) In each pit area;
- (C) In each refueling stop;
- (D) In each go kart storage area; and
- (E) In the maintenance shop.

Each fire extinguisher location shall be prominently marked and the extinguisher shall be easily accessible.

- (5) Refueling Area. Refueling of go karts shall be carried out at a designated area remote from any area accessible to the public. Refueling areas shall comply with the requirements of the NFPA 70 - National Electrical Code, Sections 510, 511, and 514.
 - (6) Track Lighting. Go kart tracks equipped for night operation shall have sufficient illumination at all sections of the track for drivers to be able to negotiate the entire course safely. It shall also be sufficient for operators to monitor the go karts on each section of the course. Lighting shall comply with the NFPA 70 - National Electrical Code and all other state and local requirements.
 - (7) Pits or Pit Areas. Where provided, pits must be fenced or provided with a sufficient barrier to prohibit the entry of spectators. Pits shall have separate entrance and exit lanes.
 - (8) Spectator Areas. Spectator areas shall be separated from the track and pit areas by a fence or barrier sufficient to withstand the impact of a go kart traveling at full speed. It shall be approximately level and free of holes or debris.
- (f) Track Operation. The following standards of operation shall apply to electric or fuel powered go karts, dune buggies, auto racers, and all terrain vehicles.
- (1) All go karts must start and stop operation at the same time or a separate pit area shall be provided for loading and unloading purposes.
 - (2) Drivers of adult go karts must be at least 48 inches (4 feet) tall and have a leg length sufficient to reach the brake and throttle controls when seated.
 - (3) Drivers of kiddie go karts shall not exceed 54 inches (4 feet 6 inches) tall and must have a leg length sufficient to reach the brake and throttle controls when seated.
 - (4) Adult go karts and kiddie go karts shall not be operated simultaneously on the same track.
 - (5) No go kart may be operated when weather conditions are such that it may affect the safe operation of the go kart or when visibility on the track is less than 150 feet.
 - (6) Each section of a go kart track shall be monitored during the time that any go kart is in operation. Monitoring shall be by direct visual contact by the operator or track attendants or by electronic visual surveillance.
 - (7) A go kart that is losing oil or fuel shall be immediately removed from the track.
 - (8) When the noise level of any go kart exceeds the requirements of Subparagraph (a)(13) of this Rule, it shall be immediately removed from the track until it has been repaired.
 - (9) Safety equipment such as helmets (when used) and seat restraints shall be utilized in accordance with the manufacturer's recommendations for the type of use or operation and be of correct size for the person using it.
 - (10) Persons with hair longer than shoulder length or wearing loose clothing that could obstruct the vision of the driver or become entangled in any moving part shall not be permitted to drive or ride a go kart. Hair that is longer than shoulder length may be tied up to reduce its length.
 - (11) Persons whose behavior appears to be impaired by such as the use of drugs or alcohol shall not be permitted to drive a go kart.
 - (12) Smoking shall not be permitted within 30 feet of a go kart.
 - (13) Track regulations shall not permit persons to leave their go karts while any go kart is in operation on the track.
 - (14) Signs containing the following information and other track regulations shall be posted at the track entrance or ticket window and conspicuously in the pit area.
 - (A) To drive or ride an adult go kart you must be at least 48 inches tall.
 - (B) To drive a kiddie go kart you may not be taller than 54 inches.
 - (C) Keep both hands on the wheel at all times.
 - (D) Keep both feet inside the go kart.
 - (E) Hair longer than shoulder length must be tied up.
 - (F) All loose clothing must be tucked in.
 - (G) No smoking within 30 feet of a go kart.
 - (H) Do not leave the go kart while on the track.

- (15) Signs that indicate the direction of travel for go karts shall be posted intermittently around the track perimeter.
- (g) Inspections and Maintenance. Tracks and go karts shall be inspected and maintained for a safe operation at all times. The following inspections shall be made:
- (1) The track shall be inspected daily for potholes, bumps or loose material. Necessary repairs shall be made before opening the track.
 - (2) Daily inspections shall be made on each go kart prior to operation. The inspection shall include:
 - (A) Wheel and tires;
 - (B) Steering mechanism;
 - (C) Frame welds;
 - (D) Axles and spindles;
 - (E) Safety belts, roll bars, and seat padding;
 - (F) Gasoline tank, lines and valves;
 - (G) Brake and throttle operation; and
 - (H) Exhaust systems.
 - (3) Go kart maintenance shall be performed as recommended by the go kart manufacturer.

13 NCAC 15 .0703 AMUSEMENT DEVICE INSPECTION FEE SCHEDULE

Inspection fees for amusement devices shall be as follows:

	Equipment	Unit Fee	Inspection Required
(1)	Rock Walls, portable	\$100.00	Annually
(2)	Kiddie Rides (48 inch maximum height restriction)	\$100.00	Every setup, except in permanent parks, which shall be inspected annually
(3)	Go Karts	\$50.00	Every setup, except in permanent parks, which shall be inspected annually
(4)	Go Kart Tracks	\$100.00	Every setup, except in permanent parks, which shall be inspected annually
(5)	Major Rides (any ride not otherwise listed herein)	\$100.00	Every setup, Except in permanent parks, which shall be inspected annually
(6)	Roller Coasters	\$250.00	Annually
(7)	Simulators, portable	\$100.00	Every setup
(8)	Simulators, stationary	\$100.00	Annually
(9)	Amusement Trains on fixed guidance systems, excluding steam engine locomotives	\$100.00	Annually
(10)	Waterslides	\$150.00	Annually
