

15A NCAC 07H .0502 SIGNIFICANCE

(a) Fragile coastal natural resource areas are generally recognized to be of educational, scientific, or cultural value because of the natural features of the particular site. These features in the coastal area serve to distinguish the area designated from the vast majority of coastal landscape and therein establish its value. Such areas may be key components of systems unique to the coast which act to maintain the integrity of that system.

(b) Areas that contain outstanding examples of coastal processes or habitat areas of significance to the scientific or educational communities are a second type of fragile coastal natural resource area. These areas are essentially self-contained units or "closed systems" minimally dependent upon adjoining areas.

(c) Finally, fragile areas may be particularly important to a locale either in an aesthetic or cultural sense.

(d) Fragile coastal cultural resource areas are generally recognized to be of educational, associative, scientific, aesthetic, or cultural value because of their special importance to our understanding of past human settlement of and interaction with the coastal zone. Their importance serves to distinguish the designated areas as significant among the historic architectural or archaeological remains in the coastal zone, and therein established their value.

History Note: Authority G.S. 113A-107(a),(b); 113A-113(b)(4e) to (b)(4g); 113A-124;
Eff. September 9, 1977;
Amended Eff. June 1, 1979;
RRC objection September 17, 2022 and rule returned to agency on October 5, 2023;
Returned to Code pursuant to order of Wake County Superior Court, currently under appeal, Eff.
March 3, 2025.
