

**18 NCAC 07J .0613 DATA CENTER SECURITY**

A technology provider shall ensure that each data center it uses has physical security measures in place that include:

- (1) restricting physical system access to personnel authorized by the provider to access the data center's system;
- (2) monitoring and logging physical access to the data center's information systems;
- (3) maintaining the physical access logs for five years; and
- (4) monitoring and responding to:
  - (a) physical intrusion alarms; and
  - (b) surveillance system observations and alerts.
