18 NCAC 07J .1609   NOTIFICATION OF IMAGE ALTERATION

A credential analysis solution shall:

      (1)   detect whether the image of a remotely located principal, whether on screen or as presented on the credential, appears to be:

           (a)   altered;

           (b)   unnatural; or

           (c)   simulated; and

      (2)   pursuant to Rule .1608 of this Section, report if credential analysis finds the appearance of alteration, unnaturalness, or simulation of the image of the principal.
