

18 NCAC 07J .1807 IDENTITY PROOFING PROCESS USING KNOWLEDGE-BASED AUTHENTICATION

An identity proofing solution using knowledge-based authentication to comply with G.S. 10B-134.11(a)(2)b shall:

- (1) require the remotely located individual to attempt an online quiz meeting the requirements of Item (2) of this Rule;
- (2) present a quiz to the remotely located individual that shall:
 - (a) consist of a minimum of five questions:
 - (i) related to the individual's personal history or identity; and
 - (ii) formulated from public or private data sources;
 - (b) have a minimum of five possible answer choices for each question;
 - (c) require the individual to submit all answers within two minutes;
 - (d) require at least 80 percent of the questions to be answered correctly in order to receive a passing score; and
- (3) inform the individual whether the quiz has been passed or failed, and if failed, of the option to retake the quiz pursuant to Rule .1808 of this Section.
