

**19A NCAC 02C .0106 PRIORITY RATINGS FOR PAVING SECONDARY ROADS**

(a) The paving of unpaved roads in any county is based upon the total needs which take into account land use and public service characteristics, traffic characteristics, and general route characteristics.

(b) A priority rating sheet is developed for each unpaved secondary road in the county as a guide line and the roads are then rated by priority, and as funds are available, the Board of Transportation attempts to meet the needs of the county.
