21 NCAC 66 .0211 VETERINARY TELEMEDICINE

- (a) "Veterinary telemedicine" or "telemedicine" means the use of electronic or telecommunication technologies to remotely provide medical information regarding a patient's clinical health status and to deliver veterinary medical services to a patient that resides in or is located in the State. The delivery of veterinary medical services through telemedicine is the practice of veterinary medicine.
- (b) A veterinarian may provide veterinary medical services via telemedicine to a patient only after establishing a Veterinarian-Client-Patient-Relationship (VCPR). No person shall practice veterinary telemedicine except a veterinarian within the context of a VCPR. A VCPR cannot be established by any electronic means or telecommunication technologies.
- (c) "Veterinary telemonitoring" occurs when any person, licensed or unlicensed, utilizes a medical device, smart phone, monitoring sensor, or other technology, in combination with an Internet connection, to collect and store health information for a patient of the veterinarian and to transmit it to a veterinarian, as directed or requested by a veterinarian.
- (d) "Veterinary Teleconsulting" occurs when any person, licensed or unlicensed, whose expertise the veterinarian believes would benefit the veterinarian's patient, provides advice or other information by any method of communication to a veterinarian at the veterinarian's direction or request.
- (e) Veterinarians practicing telemedicine shall be held to the same standard of care as veterinarians providing inperson medical care. Veterinarians shall use their professional judgement to determine whether telemedicine is appropriate and in the best interest of the patient. Veterinarians shall maintain a medical record of the telemedicine patient(s) as required by 21 NCAC 66 .0207(b)(12).
