

## **10A NCAC 15 .1507      CONTENT OF APPLICATION FOR WASTE PROCESSORS**

If the applicant for a site access license is a waste processor, the application required in Rule .1504 of this Section shall include the following additional information:

- (1) the applicable information required by Rule .1505 of this Section, if the waste processor is located within the Southeast Compact and generates waste which will be disposed at a disposal facility located in North Carolina;
- (2) a list of the states from which waste may be received for processing;
- (3) description of waste processing services and management, to include:
  - (a) the radioactive material license numbers under which such activities are conducted;
  - (b) the types of waste processing services, description of the wastes which may be processed and the estimated impact of the processing on:
    - (i) volume and contained radioactivity of processed waste which will be shipped to off-site disposal facilities; and
    - (ii) suitability of processed waste for disposal;
  - (c) procedures and program for:
    - (i) handling, identifying, accounting for, and segregating waste attendant to processing and shipment to off-site waste disposal facilities;
    - (ii) ensuring that processed waste shipped to a waste disposal facility located in North Carolina is waste generated by persons who hold a currently valid site access license issued pursuant to the rules in this Section;
    - (iii) classifying, stabilizing, solidifying liquids, packaging and monitoring waste prior to shipment, or transfer to a collector or the generator for shipment, to a disposal facility located in North Carolina;
    - (iv) preparing manifests and correlating manifests with the original manifests prepared by the waste generators for processed waste which will be disposed at a disposal facility located in North Carolina;
    - (v) ensuring that packages, labels, and radiation and contamination levels comply with applicable state and federal regulations;
    - (vi) quality assurance and quality control; and
    - (vii) ensuring that waste generated by the processor is residual waste resulting from the processor's activities and that such waste can not be identified as waste attributed to a particular generator;
- (4) a list of the waste disposal facilities to which processed waste was shipped during the past five years;
- (5) for each of the past five years, a summary of the volumes and types of waste processed and the resulting volumes of processed waste shipped off-site;
- (6) description of the applicant's notification and emergency response program in the event of accidents during transportation. This description shall include the qualifications and responsibilities of the driver; and
- (7) any regulatory notices of violation and corrective actions related to on-site and off-site management described in Items (2) and (3) of this Rule during the past five years.
