However, the owner or operator of a source shall not begin construction or operation of a source until he or she has obtained a construction and operation permit pursuant to 15A NCAC 02Q .0501(b) or (c) and 15A NCAC 02Q .0504.

(b) An application shall include the information described in 40 CFR 70.3(d) and 70.5(c), including a list of insignificant activities because of size or production rate but not including insignificant activities because of category. An application shall be certified by a responsible official for truth, accuracy, and completeness. In an application submitted pursuant to this Rule, the applicant may attach copies of applications submitted pursuant to 15A NCAC 02Q .0400 or 15A NCAC 02D .0530 or .0531 if the information in those applications contains information required in this Section and is current, accurate, and complete.

(c) Application for a permit, permit revision, or permit renewal shall be made in accordance with 15A NCAC 02Q .0104 on forms of the Division and shall include plans and specifications with complete data and information as required by this Rule. If the information provided on these forms does not describe the source or its air pollution abatement equipment to the extent necessary to evaluate the application, the Director shall request that the applicant provide other information necessary to evaluate the source and its air pollution abatement equipment.

(d) Along with filing a complete application, the applicant shall also file the following:

(e) An applicant who fails to submit relevant facts or submits incorrect information in a permit application shall, upon becoming aware of the failure or incorrect submittal, submit supplementary facts or corrected information to resolve the deficiency. In addition, an applicant shall provide additional information to address requirements to which the source becomes subject after the date the applicant filed a complete application but prior to release of a draft permit.

(f) The submittal of a complete permit application shall not affect the requirement that a facility have a permit pursuant to 15A NCAC 02D .0530, .0531, or .0532 or pursuant to 15A NCAC 02Q .0400.

(g) The Director shall give priority to permit applications containing early reduction demonstrations pursuant to Section 112(i)(5) of the federal Clean Air Act. The Director shall take final action on these permit applications after receipt of the complete permit application.
