The unit is in good condition, with no leaks or other continuing or intermittent unpermitted releases of the hazardous secondary materials or hazardous constituents originating from the hazardous secondary materials to the environment, and is designed, as appropriate for the hazardous secondary materials, to prevent releases of hazardous secondary materials to the environment. "Unpermitted releases" means releases that are not covered by a permit (such as a permit to discharge to water or air) and may include, but are not limited to, releases through surface transport by precipitation runoff, releases to soil and groundwater, windblown dust, fugitive air emissions, and catastrophic unit failures;

2. The unit is properly labeled or otherwise has a system (such as a log) to immediately identify the hazardous secondary materials in the unit; and

3. The unit holds hazardous secondary materials that are compatible with other hazardous secondary materials placed in the unit and is compatible with the materials used to construct the unit and addresses any potential risks of fires or explosions.

4. Hazardous secondary materials in units that meet the applicable requirements of 40 CFR parts 264 or 265 are presumptively contained.

(d) The following additional definitions shall apply throughout this Subchapter:

1. "Section" means the Hazardous Waste Section, in the Division of Waste Management, Department of Environmental Quality.

The historical high ground water level shall be determined by measuring the seasonal high ground water levels and predicting the long-term maximum high ground water level from published data on similar North Carolina topographic positions, elevations, geology, and climate; and

(iii) all hazardous waste shall be located a minimum of 1,000 feet from the zone of influence of any existing off-site ground water well used for drinking water, and outside the zone of influence of any existing or planned on-site drinking water well.

(D) Hazardous waste storage and treatment facilities for liquid waste that is classified as hazardous waste due to the Toxicity Characteristic, as defined in 40 CFR 261.24, or is classified as Acute Hazardous Waste or Toxic Waste, as defined in 40 CFR 261.30(b), and is stored or treated in tanks or containers shall not be located:

(i) in the recharge area of an aquifer that is designated as an existing sole drinking water source as defined in the Safe Drinking Water Act, Section 1424(e) [42 U.S.C. 300h-3(e)] unless an adequate secondary containment system, as described in 40 CFR 264, is constructed, and after consideration of applicable factors in Subparagraph (r)(3) of this Rule, the owner or operator demonstrates no risk to public health;

(ii) within 200 feet of surface water impoundments or surface water stream with continuous flow as defined by the United States Geological Survey;

(iii) in an area that will allow direct surface or subsurface discharge to WS-I, WS-II or SA waters or a Class III Reservoir as defined in 15A NCAC 02B .0200 and 15A NCAC 18C .0102;

(v) within 200 feet horizontally of a 100-year floodplain elevation;
(vi) within 200 feet of a seismically active area; and
(vii) within 200 feet of a mine, cave, or cavernous bedrock.

(3) The Department shall require any hazardous waste management facility to comply with greater separation distances or other protective measures when necessary to avoid risks posed by the proximity of the facility to: water table levels; flood plains; water supplies; public water supply watersheds; mines; population centers; natural resources such as wetlands, endangered species habitats, parks, forests, wilderness areas, and historical sites; or to provide a buffer zone as required by this Rule. The Department shall also require protective measures when necessary to avoid unreasonable risks posed by the soil pH, soil cation exchange capacity, soil characteristics, composition, and permeability; slope; climate; local land use; transportation factors such as proximity to waste generators, route, route safety, and method of transportation; aesthetic factors such as the visibility, appearance, and noise level of the facility; potential impact on air quality; and the existence of seismic activity and cavernous bedrock. In determining whether to require greater separation distances or other protective measures, the Department shall consider the following factors:

(A) all proposed hazardous waste activities and procedures to be associated with the transfer, storage, treatment, or disposal of hazardous waste at the facility;
(B) the type of hazardous waste to be treated, stored, or disposed of at the facility;
(C) the volume of waste to be treated, stored, or disposed of at the facility;
(D) land use issues including the number of permanent residents in proximity to the facility and their distance from the facility;
(E) the adequacy of facility design and plans for containment and control of sudden and non-sudden accidental events in combination with adequate off-site evacuation of potentially impacted populations;
(F) other land use issues including the number of institutional and commercial structures such as airports and schools in proximity to the facility, their distance from the facility, and the particular nature of the activities that take place in those structures;
(G) the lateral distance and slope from the facility to surface water supplies or to watersheds draining into surface water supplies;
(H) the vertical distance, and type of soils and geologic conditions separating the facility from the water table;
(I) the direction and rate of flow of ground water from the sites and the extent and reliability of on-site and nearby data concerning seasonal and long-term groundwater level fluctuations;
(J) potential air emissions including rate, direction of movement, dispersion and exposure, whether from planned or accidental, uncontrolled releases; and
(K) any other relevant factors.

(4) The following are additional location standards for hazardous waste landfills, hazardous waste long-term storage facilities, and hazardous waste surface impoundments:

(A) A hazardous waste landfill, long-term storage, or a surface impoundment facility shall not be located:

(viii) soils shall be underlain by a geologic formation having a rock quality designation equal to or greater than 75 percent.

(C) A hazardous waste landfill or long-term storage facility shall be located in areas of low to moderate relief to the extent necessary to prevent landsliding or slippage and slumping. The site may be graded to comply with this standard.

(5) All new hazardous waste impoundments that close with hazardous waste residues left in place shall comply with the standards for hazardous waste landfills in Subparagraph (r)(4) of this Rule.

(6) The owners and operators of all new hazardous waste management facilities shall construct and maintain a minimum of two observation wells, one upgradient and one downgradient of the proposed facility; and shall establish background groundwater concentrations and monitor annually for all hazardous wastes that the owner or operator proposes to store, treat, or dispose at the facility.

(7) The owners and operators of all new hazardous waste facilities shall demonstrate that the community has had an opportunity to participate in the siting process by complying with the following:

Public notice shall include the time, place, and purpose of the meetings required by this Rule.

(C) No less than 30 days after the first public meeting transcript is available at the local public library, the owners and operators shall hold at least one additional public meeting in order to attempt to resolve community concerns. The owners and operators shall provide public notice of this meeting at least 30 days prior to the meeting. Public notice shall be documented in the facility permit application. The owners and operators shall submit as part of the permit application a complete written transcript of the meeting, all written material submitted that represents community concerns, and all other relevant written material distributed or used at the meeting.

15A NCAC 13A .0116  COMMERCIAL HAZARDOUS WASTE FACILITY SCORING FOR CATEGORY DETERMINATION

(a) The Department shall evaluate all commercial hazardous waste facilities to determine a score for each facility in accordance with Paragraph (c) of this Rule.

(b) A commercial hazardous waste facility (other than an incinerator or a land disposal facility) with a volume of waste of 20,000 tons or less per year of hazardous waste and having a total score pursuant to Paragraph (c) of this Rule of equal to or less than 40 is designated as a "special purpose commercial hazardous waste facility." These facilities shall be classified as follows:

<table>
<thead>
<tr>
<th>Total Score</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-11</td>
<td>1</td>
</tr>
<tr>
<td>Greater than 11-18</td>

</tr>
<tr>
<td>Greater than 25-32</td>
<td>4</td>
</tr>
<tr>
<td>Greater than 32-40</td>
<td>5</td>
</tr>
</tbody>
</table>

(c) A score for each facility shall be determined by adding the total score for Paragraphs (d) through (k) of this Rule and subtracting the score for Paragraph (l) of this Rule.

(d) A score shall be assigned for size of the facility by adding the applicable score for storage and the applicable score for treatment using Table 1.

(f) A score shall be assigned for the nature of hazardous waste being treated or stored by adding the score for each type of waste managed at the facility using Table 3. However, if the facility is permitted for storage only and no treatment is performed, the score for the nature of hazardous waste shall be reduced by one-half for each hazardous waste stream stored only.

"Baseline" means:

(1) for existing "Special Purpose Commercial Hazardous Waste Facilities" as the January 2008 data collected from the local government that has planning jurisdiction over the site on which the facility is located; and

(2) for new "Special Purpose Commercial Hazardous Waste Facilities" as the data from the local government that has planning jurisdiction over the site on which the facility is located collected in the year in which the facility permit is first issued.

(m) The information referred to in Paragraphs (c) through (l) of this Rule shall be determined based on the facility's permit, the previous year's annual report, and compliance history. If no annual report was submitted, quarterly projections of waste volume shall be submitted to the Department by the facility. Each facility may be re-evaluated at any time new information is received by the Department concerning the factors in Paragraphs (c) through (l) of this Rule.
