All dentists who perform conscious sedation shall have an unexpired sedation permit from the Dental Board.
14. A permit is not required for prescription administration of DEA controlled drugs prescribed for postoperative pain control intended for home use. A dentist may obtain a minimal conscious sedation permit from the Board by completing the application requirements of this Rule and paying a fee of three-hundred seventy-five dollars ($375.00) that includes the one-hundred dollar ($100.00) application fee and the two-hundred seventy-five dollar ($275.00) inspection fee. Such permit must be renewed annually and shall be displayed with the current renewal at all times in the facility of the permit holder where it is visible to patients receiving treatment.

(c) An applicant for a minimal conscious sedation permit shall be licensed and in good standing with the Board in order to be approved. For purposes of these Rules "good standing" means that the applicant is not subject to a disciplinary investigation and his or her licensee has not been revoked or suspended and is not subject to a probation or stayed suspension order.

If the permit applicant fails to obtain a passing score on the written examination that is administered during the evaluation, he or she may be re-examined in accordance with Subparagraph (d)(7) of this Rule.

The evaluator shall assign a recommended grade of pass or fail and shall report his or her recommendation to the Board, setting out the basis for his conclusion. The Board is not bound by the evaluator's recommendation and shall make a final determination regarding whether the applicant has passed the evaluation. The applicant shall be notified of the Board's decision in writing.

An applicant who fails an inspection or evaluation may request a re-evaluation or re-inspection within 15 days of receiving the notice of failure. 4. If the dentist responsible for administering minimal conscious sedation must deviate from the requirements set out in this Rule, he or she shall document the occurrence of such deviation and the reasons for such deviation.

(f) Post-operative procedures:

1. Following the operative procedure, positive pressure oxygen and suction equipment shall be available in the recovery area or operatory.

(A) oxygenation, circulation, activity, skin color and level of consciousness are sufficient and stable and have been documented;
(B) explanation and documentation of written postoperative instructions have been provided to the patient or a person responsible for the patient at the time of discharge;
(C) a person authorized by the patient must be available to transport the patient and for patients for whom a motor vehicle restraint system is required, an additional individual must be available to attend to the patient.
