COMPONENTS OF NURSING PRACTICE FOR THE LICENSED PRACTICAL NURSE

(a) A licensed practical nurse shall accept only those assigned nursing activities and responsibilities, as defined in Paragraphs (b) through (i) of this Rule, that the licensee can safely perform, as determined by practice setting variables such as:

1. the nurse's qualifications in relation to client need and plan of nursing care, including:
   A. basic educational preparation; and
   B. knowledge and skills subsequently acquired through continuing education and practice;
2. the degree of supervision by the registered nurse consistent with Paragraph (d)(3) of this Rule;
3. the stability of each client's clinical condition;
4. the complexity and frequency of nursing care needed by each client or client group;
5. the accessible resources; and
6. established policies, procedures, practices, and channels of communication that lend support to the types of nursing services offered.

(b) Assessment is an on-going process and shall consist of participation in the determination of nursing care needs based upon collection and interpretation of data relevant to the health status of a client.

1. Collection of data shall consist of obtaining data from relevant sources regarding the biophysical, psychological, social, and cultural factors of the client's life and the influence these factors have on health status, according to structured written guidelines, policies, and forms, including:
   A. subjective reporting;
   B. observations of appearance and behavior;
   C. measurements of physical structure and physiologic function; and
   D. information regarding resources available to the client.
2. Interpretation of data shall be limited to:
   A. participation in the analysis of collected data by recognizing existing relationships between data gathered and a client's health status and treatment regimen; and
   B. determining a client's need for immediate nursing interventions based upon data gathered regarding the client's health status, ability to care for self, and treatment regimen, consistent with Paragraph (a)(6) of this Rule.

(c) Planning nursing care activities shall include participation in the identification of client's needs related to the findings of the nursing assessment. Components of planning include:

1. participation in making decisions regarding implementation of nursing intervention, medical orders, and plan of care through the utilization of assessment data;
2. participation in multidisciplinary planning by providing resource data; and
3. identification of nursing interventions and goals for review by the registered nurse.

(d) Implementation of nursing activities shall consist of delivering nursing care according to an established health care plan and as assigned by the registered nurse or other individuals authorized by law as specified in 90-171.20(8)c.

1. Nursing activities and responsibilities that may be assigned to the licensed practical nurse shall include:
   A. procuring resources;
   B. implementing nursing interventions and medical orders consistent with Paragraph (b) of this Rule and 21 NCAC 36 .0221(c) and within an environment conducive to client safety;
   C. prioritizing and performing nursing interventions;
   D. recognizing responses to nursing interventions;
   E. modifying immediate nursing interventions based on changes in a client’s status; and
   F. delegating specific nursing tasks as outlined in the plan of care and consistent with Paragraph (d)(2) of this Rule and 21 NCAC 36 .0401.

2. The licensed practical nurse may participate, consistent with 21 NCAC 36 .0224(d)(6), in implementing the health care plan by assigning nursing care activities to other licensed practical nurses and delegating nursing care activities to unlicensed personnel qualified and competent to perform such activities, if all of the following criteria are met:
   A. validation of qualifications of personnel to whom nursing activities may be assigned or delegated;
continuous availability of a registered nurse for supervision consistent with 21 NCAC 36 .0224(i) and Paragraph (d)(3) of this Rule;
accountability maintained by the licensed practical nurse for responsibilities accepted, including nursing care given by self and by all other personnel to whom such care is assigned or delegated;
participation by the licensed practical nurse in on-going observations of clients and evaluation of clients' responses to nursing actions; and
provision of supervision limited to the validation that tasks have been performed as assigned or delegated and according to established standards of practice.

The degree of supervision required for the performance of any assigned or delegated nursing activity by the licensed practical nurse when implementing nursing care shall be determined by variables that include:

(A) educational preparation of the licensed practical nurse, including both the basic educational program and the knowledge and skills subsequently acquired by the nurse through continuing education and practice;
(B) stability of the client's clinical condition, which involves both the predictability and rate of change. If a client's condition is one in which change is highly predictable and would be expected to occur over a period of days or weeks rather than minutes or hours, the licensed practical nurse may participate in care with minimal supervision. If the client's condition is unpredictable or unstable, the licensed practical nurse may participate in the performance of the task under close supervision of the registered nurse or other individuals authorized by law to provide such supervision;
(C) complexity of the nursing task, which is determined by depth of scientific body of knowledge upon which the action is based and by the task's potential threat to the client's well-being. If a task is complex, the licensed practical nurse shall participate in the performance of the task under close supervision of the registered nurse or other individuals authorized by law to provide such supervision;
(D) the complexity and frequency of nursing care needed by the client population;
(E) the qualifications and number of personnel in the facility in which the nurse practices;
(F) the accessible resources in the facility in which the nurse practices; and
(G) established policies, procedures, practices, and channels of communication that lend support to the types of nursing services offered.

(e) Evaluation, a component of implementing the health care plan, shall consist of participation in determining the extent to which desired outcomes of nursing care are met and in planning for subsequent care, including:

(1) collecting evaluative data from relevant sources according to written guidelines, policies, and forms;
(2) recognizing the effectiveness of nursing interventions; and
(3) proposing modifications to the plan of care for review by the registered nurse or other individuals authorized by law to prescribe such a plan.

(f) Reporting and recording shall be those communications required in relation to the aspects of nursing care for which the licensed practical nurse has been assigned responsibility.

(1) Reporting means the communication of information to other individuals responsible for or involved in the care of the client. The licensed practical nurse shall:

(A) direct the communication to the appropriate individuals;
(B) assure that these communications are consistent with established policies, procedures, practices, and channels of communication which lend support to types of nursing services offered;
(C) communicate within a time period that is consistent with the client's need for care;
(D) evaluate the nature of responses to information reported; and
(E) determine whether further communication is indicated.

(2) Recording means the documentation of information on the appropriate client record, nursing care plan, or other documents. This documentation shall:

(A) be pertinent to the client's health care, including client's response to care provided;
(B) accurately describe all aspects of nursing care provided by the licensed practical nurse;
(C) be completed within a time period consistent with the client's need for care;
(D) reflect the communication of information to other persons; and
(E) verify the proper administration and disposal of controlled substances.

(g) Collaborating involves communicating and working cooperatively in implementing the health care plan with individuals whose services may have a direct or indirect effect upon the client's health care. As delegated by the registered nurse or other individuals authorized by law, the licensed practical nurse's role in collaborating in client care shall include:

(1) participating in planning and implementing nursing or multidisciplinary approaches for the client's care;
(2) seeking and utilizing appropriate resources in the referral process; and
(3) safeguarding confidentiality.

(h) Participating in the teaching and counseling of clients as assigned by the registered nurse, physician or other qualified professional licensed to practice in North Carolina shall be the responsibility of the licensed practical nurse. Participation shall include:

(1) providing accurate and consistent information, demonstrations, and guidance to clients, their families, or significant others for the purpose of:
   (A) increasing knowledge regarding the client's health status and health care;
   (B) assisting the client to reach an optimum level of health functioning and participation in self-care; and
   (C) promoting the client's ability to make informed decisions.
(2) collecting evaluative data consistent with Paragraph (e) of this Rule.

(i) Accepting responsibility for self for individual nursing actions, competence, and behavior including:

(1) having knowledge and understanding of the statutes and rules governing nursing;
(2) functioning within the legal boundaries of licensed practical nurse practice; and
(3) respecting client rights and property and the rights and property of others.
