

21 NCAC 50 .0518 RESTRICTED LIMITED PLUMBING CONTRACTOR LICENSE

Licensure in the Restricted Limited Plumbing Contractor classification is required of persons who do not possess a license as a plumbing contractor, but contract install, repair or replace:

- (1) exterior building sewer piping, as defined in the North Carolina Plumbing Code, which is hereby incorporated by reference including all subsequent editions and amendments. The document can be accessed at <http://www.NCDOL.com/OSFM/engineering>.
- (2) exterior water service piping two inch diameter or less, as defined in the North Carolina Plumbing Code;
- (3) exterior backflow preventers connected to water service piping two inches in diameter or less; or
- (4) water filtration systems or components of water filtration systems that filter, treat, condition or remove impurities from potable water by means of a fine physical barrier or membrane, a chemical process or a biological process, and which are installed on a water distribution line or water service piping, as defined in North Carolina State Plumbing Code.
