

21 NCAC 58A .1707 ELECTIVE COURSE CARRY-OVER CREDIT

A maximum of four hours of continuing education credit for an approved elective course taken during the current license period may be carried over to satisfy the continuing education elective requirement for the next following license period if the licensee receives no continuing education elective credit for the course toward the elective requirement for the current license period or the previous license period. However, if a continuing education elective course is used to wholly or partially satisfy the elective requirement for the current or previous license period, then any excess hours completed in such course which are not needed to satisfy the four-hour elective requirement for that license period may not be carried forward and applied toward the elective requirement for the next following license period.
